Updated July 11, 2024

What are SDCs?

The City of Ontario is committed to providing quality services to our community. As the city grows, old systems need to be updated and new systems must be built.

System Development Charges (SDCs) are fees imposed upon new and expanding development within the City of Ontario and the urbanizing area that connects to the water system, sanitary sewer system and streets.

The objective of SDCs is to charge new users an equitable share of the cost of services and to pay for improvements necessary as a result of increased development and demand on the City's infrastructure.

On July 21, 2008, the City of Ontario adopted Ordinance 2618-2008 allowing the creation of System Development Charges. SDCs are in place to fund the water, wastewater and transportation systems. Resolution 2008-146 was adopted on Sept. 3, 2008, which established SDCs for water, wastewater and transportation.

Ontario Municipal Code (OMC) 8-13-13(b) Challenges and Appeals states the following: Any person may appeal to the Council any decision of the Administrator made pursuant to this ordinance by filing a written request with the Administrator within 10 days after the delivery of the Administrator's written decision to the applicant.

This brochure is intended to be used as a guideline for estimating SDCs as part of total project costs. Fees for all types and categories of businesses and all meter sizes are not listed in this brochure. It does not include information on other potential fees which may be due, including but not limited to planning review fees, engineering fees, building permit fees, water and sewer connection fees, etc.

Water and Sewer System Fees:

There are currently no water or sewer SDC fees for residential connections.

SDCs are charged and payable prior to the issuance of a permit to connect to the water and/or sewer system.

Water SDCs are charged by meter size. Wastewater system flows are assumed to be directly proportionate to water meter size. The table below displays SDC rates for the most requested meter sizes. Please call for SDCs on meter sizes greater than 2 inches.

METER SIZE (INCHES)	WATER SDC	WASTEWATER SDC
1 or less	\$975	\$481
1.5	\$4,875	\$2,405
2	\$7,800	\$3,848

Transportation:

Transportation SDCs pays for the expansion and capital development of the transportation system to accommodate and manage motorized traffic.

The Transportation SDC is based on the average amount of traffic generated by new development. The City adopted the method of calculating the SDCs based on recommendations of a SDC methodology consultant. The consultant researched traffic studies and recommended that similar land uses be categorized into groups based on generated traffic, with each group assigned an average trip generation rate. This rate is used to determine "average weekday traffic" based on either the number of residential units or the type of use and square footage of

Transportation (continued):

non-residential units. This group rate is multiplied by an established rate and then multiplied by an established dollar amount to determine the SDC. The amount was calculated based upon the estimated costs of funding the improvements in the City's adopted Transportation System Plan.

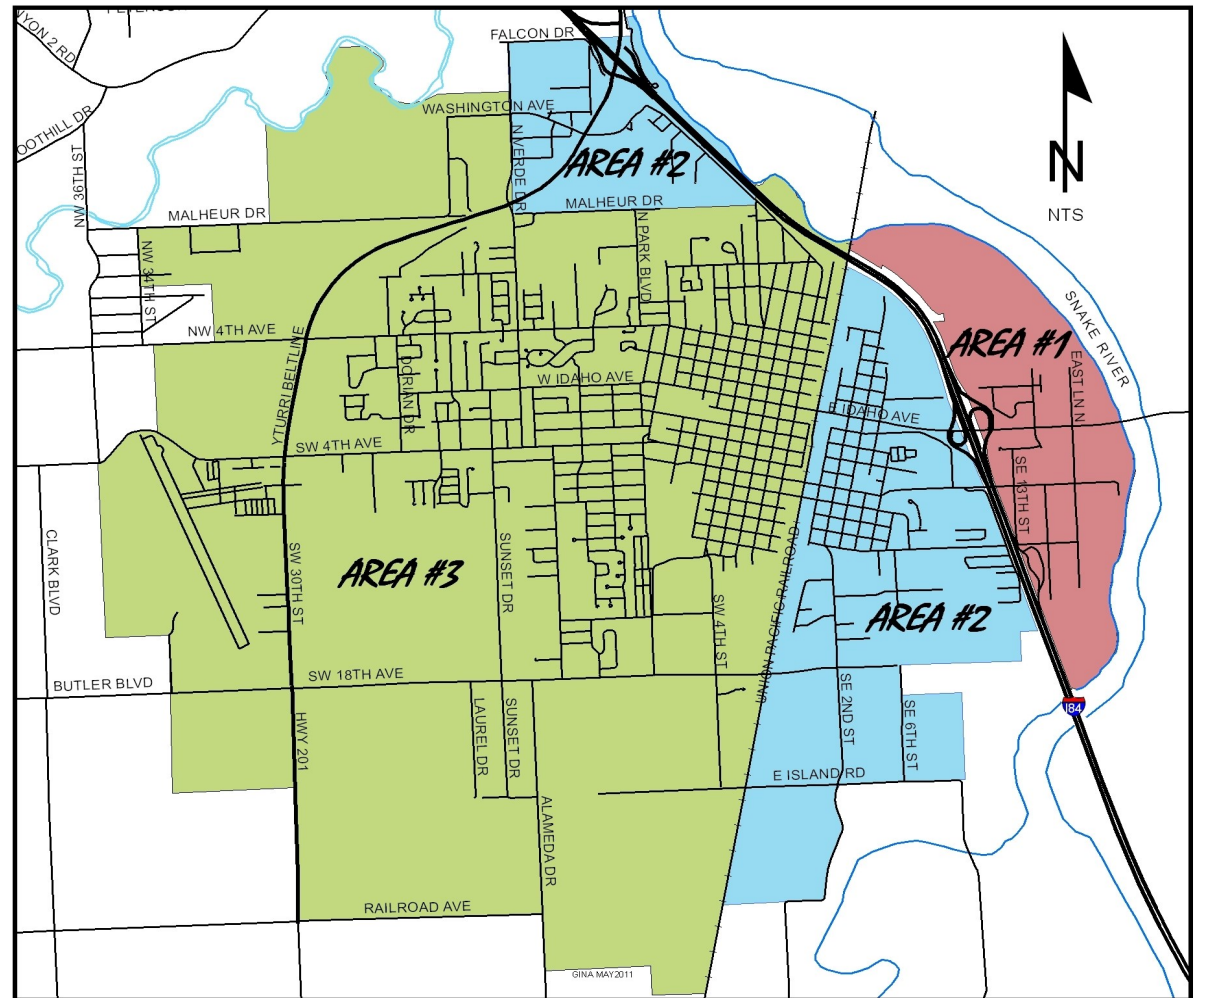

The SDC fee is calculated at the time building plans are submitted, provided such plans are complete. Transportation SDC are paid prior to the issuance of a building permit for construction.

TOTAL TRANSPORTATION SDC PER UNIT OF DEVELOPMENT		
ITE LAND USE CODE/ CATEGORY	RATE PER UNIT	UNIT
RESIDENTIAL		
Single Family Detached	\$1,288	Dwelling Unit
Apartment	\$905	Dwelling Unit
Residential Condo/Townhouse	\$789	Dwelling Unit
Manufactured Housing (in Park)	\$672	Dwelling Unit
Assisted Living	\$369	Bed
Continuing Care Retirement	\$378	Unit
Recreation Home	\$425	Dwelling Unit
Duplex	\$850	Duplex
Multi-Family Housing	\$425	Dwelling Unit

For information on other potential costs associated with your project, please contact the City of Ontario Public Works Department at 541-889-8572

160 Data Centers	\$141	TSGFGA

Transportation Trip End Key:
Abbreviations used in the “unit” column:
*TSGFGA = Thousand Sq. Ft. Gross Floor Area
*TSGFLA = Thousand Sq. Ft. Gross Leasable Area
*VFP = Vehicle Fueling Position
**Because there is no Institute of Transportation Engineers (ITE) Weekday Average Trip Rate for this code/category, the Trip Rate shown is the ITE P.M. Peak Hour Trip Rate multiplied by a factor of 10.
For more information regarding the calculation of System Development Charges, please contact CH2M at 541-889-8572.
